Salt (NaCl)	min	1.90%
Salt (NaCl)	max	2.40%
Sodium (Na)	min	0.80%
Sodium (Na)	max	1.30%
Potassium (K)	min	0.40%

INGREDIENTS

Citric Acid (preservative), Lactic Acid, Acetic Acid, Potassium Sorbate (preservative), Calcium Lactate, Dextrose, Corn Syrup, Salt, Potassium Chloride, L-Lysine Monohydrochloride, DL-Methionine, L-Threonine, Glycine, Monosodium Glutamate, Monosodium Phosphate, Sodium Benzoate (preservative), Zinc Proteinates, Iron Proteinates, Copper Proteinates, Manganese Proteinates, Vitamin A Acetate, Vitamin D3 Supplement, Vitamin E Supplement, Riboflavin, Glycerin, Oregano, Maltodextrin, Mixed Tocopherols (preservative), Magnesium Proteinates, Betaine Hydrochloride, Zinc Sulfate, Menadione Nicotinamide Bisulfite (a source of Vitamin K Activity), Niacinamide, Calcium Pantothenate, Choline Bitartrate, Vitamin B12 Supplement, Biotin, Folic Acid, Ascorbic Acid, Pyridoxine Hydrochloride, Thiamine Mononitrate, Dried Lactobacillus acidophilus Fermentation Product, Water, Blue #1, Natural and Artificial Flavors.

STORAGE

Store at temperatures between 70° F and 100° F.

DIRECTIONS FOR USE:

Provide in the drinking water of pigs during periods of dehydration as a result of management or environmental stress such as periods of heat stress, weaning, sorting, and/or handling for 36-48 hours.

Deliver in the drinking water one of the following two ways:

1. Stock Solution: Deliver at the rate of 1 to 2 ounces (1:128 or 1:64 dilution) to each gallon of drinking water. Maximum dilution is 1:50 or 2%. (Product is ready to use, no dilution required.)
2. Applying directly to water supply (water tank): Add 1 to 2 ounces of product to each gallon of drinking water.

Water Intake:

Pigs normally consume between 8-12% of body weight in water depending on several factors such as air temperature, stress, and disease level. Below is a table indicating the estimated water intake of nursery pigs at various body weights.

Body Weight	Estimated water intake
10-20 lbs	0.25-0.50 gallon
20-30 lbs	0.50-0.75 gallon
30-60 lbs	0.75-1.0 gallon

CAUTION:

Pigs showing symptoms of coma, shock or are too weak and dehydrated to eat and drink normally should be treated as directed by a veterinarian.
