Advantages
• Ready to use (RTU) - no mixing required.
• Labor-saving 1-mL dose – easy on nursing piglets and staff.
• Control 2 diseases in 1 injection.
• Demonstrated heterologous circovirus protection.
• 3 different classes of adjuvants in StimGard Plus™ help provide for an optimal immune response.

Dosage / Administration
• Shake well before use. Using aseptic technique, inject a single 1.0-mL dose intramuscularly (IM).

Indications / Uses
• For use in healthy piglets of all breeds, 10 days of age or older, against Porcine Circovirus, Type 2, and Mycoplasma hyopneumoniae.

Precautions
• CAUTION: For animal use only.
• Store at 2 to 8°C (35-45°F). Do not freeze. Shake well before use. Use entire contents upon opening.
• Do not vaccinate within 21 days before slaughter.
• Transient reaction may occur at the injection site. If anaphylaxis occurs, use epinephrine or equivalent. Contains merthiolate (Thimerosal) as a preservative.
• This product has not been tested in pregnant animals.

Packaging
• 50-mL or 250-mL vials.
• Available in custom sizes.

Ordering Information
• Prod. number:
  25010-50 (50 mL)
  25010-250 (250 mL)

Key Features
• Pig-proven under field conditions.
• StimGard Plus™ trivalent adjuvant system helps optimize both cell-mediated and humoral immune responses.
• Safe; studies show a <0.3% reaction rate.
• Excellent syringeability.
• Advanced purification process allows low-volume injection for minimal tissue reaction.
• No mixing means less handling, mistakes and mess.
• QR (quick response) codes on the label for inventory and tracking purposes.

Product Profile
Circo/MycoGard®
Porcine Circovirus Vaccine, Type 2, Killed Baculovirus Vector, Mycoplasma hyopneumoniae Bacterin

Product Description
• One-dose combination of porcine circovirus (PCV) Type 2b vaccine and Mycoplasma hyopneumoniae bacterin for vaccination of swine

• Inactivated trivalent-adjuvanted formulation using StimGard Plus™ adjuvant

• Each vial contains 50 or 250 doses (1 mL/dose)
Circo/MycoGard
Porcine Circovirus Vaccine, Type 2, Killed Baculovirus Vector, Mycoplasma hyopneumoniae Bacterin

Porcine Circovirus Vaccine, Type 2, Killed Baculovirus Vector, Mycoplasma Hyopneumoniae Bacterin

This product has been shown to be effective for the vaccination of healthy pigs, 10 days of age or older against Porcine Circovirus, Type 2, and Mycoplasma Hyopneumoniae. To review efficacy and safety data, go to productdata.aphis.usda.gov.

ADMINISTRATION AND DOSAGE:
Dose: 1.0 mL intramuscularly (I.M.).
CAUTION: For animal use only. Do not mix with other products, except as specified on this label. In case of human exposure, contact a physician. Store at 2 to 8°C (35°F to 46°F). Do not freeze. Shake well before use. Use entire contents upon opening. Do not vaccinate within 21 days before slaughter. Transient reaction may occur at the injection site. If anaphylaxis occurs, use epinephrine or equivalent. Contains merthiolate (Thimerosal) as a preservative. This product has not been tested in pregnant animals. Revaccination interval not established.
