PROPYLENE GLYCOL

VetOne

Oral

Ketosis Treatment for Dairy Cattle

Keep out of reach of children.

Not for human use.

ADMINISTRATION: For use mixed with feed or as a drench.

INDICATIONS: For use in the treatment and prevention of bovine ketosis (acetonemia).

INGREDIENTS: 100% Propylene Glycol

DOSAGE: In dairy cattle, administer 6-16 ounces per head, per day for 10 days. Severe cases of ketosis may require larger doses. Before administering Propylene Glycol to cows suffering from milk fever, mastitis, or metritis, consult a veterinarian.

PREVENTION: In dairy cattle, administer 6-16 fluid ounces per day beginning 2 weeks before calving and continuing 6 weeks after calving.
